

ACCUDIAGNOSTICS PUTS DRUG SCREENING to the TEST in LOS ANGELES

Los Angeles, CA, June 12, 2009—AccuDiagnostix, a full service drug testing company, will open a franchise in Los Angeles on June 12, 2009. The business is located at 2320 South Robertson Blvd., Ste 201, in West Los Angeles.

AccuDiagnostix' mission is to provide affordable and comprehensive drug and alcohol testing to help curtail the epidemic rise in substance abuse at the workplace.

AccuDiagnostix' services also include onsite and offsite urine, hair, sweat and saliva analysis, Department of Transportation (D.O.T.) regulated testing, and DNA/paternity testing.

Drug and alcohol abuse is a bottom-line, financial issue for companies. 75% of all abusers are employed, either full or part time. They are five times more likely to file a Worker's Comp claim, use three times more sick benefits and are 25% less productive.

AccuDiagnostix' works with businesses and government organizations to create a Drug Free Workplace program through preliminary and periodic testing, the development of policy and procedure initiatives and the supply of screening kits to organizations that have certified collection/testing personnel on staff.

"I think it's only a matter of time before all companies realize the huge impact a sustained drug testing program can have for their overall economic health," says Bob Duncan, President of the Los Angeles based franchise. "Less workplace accidents, less corporate liability, less employee turnover, less insurance premiums. It's an overall win for businesses' and their bottom line.

This leading-edge company is committed to innovation and offers an advanced, instant drug test that produces same day results on all negative screenings, instead of the usual 3 to 4 days.

For more information or for a free consultation with AccuDiagnostix to develop a drug screening program that's right for your company, call (310)862-4333 or visit us on the web at http://www.accudiagnostix.com/los_angeles
